

UX benchmarking, made instant.

Jurnii UX platform is an automated competitor benchmarking tool that transforms how businesses measure and improve their digital experiences though:

Automated Experience Analysis,
reducing time and cost of manual
UX audits by 99%

Directly Benchmarking over 400
industry specific data points vs
your closest competitors

Delivering specific, tailored and
actionable recommendations to
improve your brands CX

Take their word for it ↓

Our clients saw incredible results,
reducing months of research effort to just minutes.

“I am blown away by the volume and the richness of the report Jurnii provides. A really powerful tool that gave me a ‘first time using ChatGPT’ feeling.”

David Cox
CX Consultant

Ryan Schembri
CPO at Betsson

“This kind of report would have taken three months to generate via usual research processes.”

Trusted by

Example Insights

Severity: High

Registration and sign-in buttons lack sufficient visual distinction on mobile, reducing their effectiveness, especially for new users.

Recommendation

Apply high-contrast colors, larger touch targets, and consistent placement (top-right or persistent sticky footer).

Example Insights

Severity: Medium

The call-to-action in the hero banner is not clearly identifiable as clickable, reducing its effectiveness

Recommendation

Use a clear, styled button (e.g. filled, rounded, with hover/tap feedback) with action-focused text like “Get Bonus” or “Play Now.” Add motion cues like micro-animations or hover effects for clarity.

Example Insights

Severity: High

The main CTA in the registration form is positioned below the fold on mobile, making it less immediately accessible.

Recommendation

Consider implementing a multi-step funnel to ensure the CTA is always visible without excessive scrolling.

Example Insights

Severity: Low

Some error messages contain hashtags, which may confuse users or appear as placeholder text not meant for public view.

Recommendation

Implement user-friendly, plain language error messages with helpful context (e.g., “Invalid email. Please use a valid format like name@example.com”). Remove all internal dev tags like hashtags from production.

Platform use cases:

Problem Discovery

UX and Product teams are using Journii AI to proactively surface pain points across their digital experiences — fast, always-on analysis that uncovers UX friction points, without digging through surveys, heatmaps or analytical/customer data.

Measuring the Impact of Fixes

Jurnii AI provides a clear, consistent way to track whether specific product or UX changes actually improve the experience — closing the loop on UX improvements over time and across key journeys.

Instantly Benchmark Against Competitors

Competitive research used to be slow, expensive, and manual. Journii AI benchmarks a brand's UX against their closest competitors — providing a side by side view of where they under/over perform in minutes.

Compare Experience Quality Across Brands, Products & Markets

For businesses managing multiple regions, brands, verticals, or product lines, Journii AI delivers a unified view and singular experience metric set — showing where performance excels or slips across a business' offering.

Map Out Customer Journeys — and see how they compare

Jurnii AI automatically visualises core user flows and friction points, helping teams isolate journey differences between them and their competition, be in steps to purchase or breadth of offering.

Competitive Intelligence Tracker

Stay ahead of the market with live alerts on competitor changes, including new features and promotions. Jurnii AI tracks and surfaces this data instantly, keeping you informed about market shifts.

Market Understanding

Before launching in a new market or vertical, businesses use Journi AI to analyze competitor performance, customer journey expectations, and UX standards specific to that region or industry. This enables teams to identify unmet needs, common friction points, and whitespace opportunities.

Pricing

Jurnii UX

Fixed & Flexible Plans

We provide two subscription options - Fixed and Flexible - tailored to how clients want to analyse digital experiences.

The Fixed Subscription is ideal for ongoing competitor tracking — clients choose a set number of brands, which Jurnii benchmarks in-depth and updates regularly, allowing for continuous performance monitoring and trend analysis.

The Flexible Subscription gives clients the freedom to audit any brands they choose at any point throughout the year (minimum 5). It includes full platform access and is priced per brand, with each analysis providing a one-time snapshot of performance, without ongoing updates.

Brands (minimum of 5)	5	10	15	20	50	100	100+
Fixed Subscription (Yearly)	£10,500	£18,500	£25,000	£30,000	£64,000	£120,000	POR
Flexible Subscription* (Yearly)	£8,500	£13,000	£17,500	£22,000	£49,000	£94,000	POR
*On flexible plan the price per brand is £900
