

• THE INTELLIGENCE LAYER FOR IGAMING

Compete on Experience. Win on Intelligence.

Automating UX benchmarking, competitor tracking, and marketing attribution — in near real time.

UX INTELLIGENCE

Jurnii UX

COMMERCIAL RADAR

Jurnii 360

MARKETING ATTRIBUTION

Cortex

iGaming operators are flying blind in a commoditised market.

01

Manual & reactive

UX benchmarking done by hand takes weeks. By the time insight arrives, the market has already moved.

02

Siloed intelligence

Product, marketing, and leadership operate from different data — no shared commercial view.

03

Rising CAC

With 3–5 accounts per player, loyalty is fragile. Minor friction compounds and kills conversion silently.

04

No attribution

Operators can't measure the true impact of one of the key levers of their marketing spend — their promo and pricing offering.

Not an agency. Not an analytics tool.

An intelligence layer.

Jurnii is the proprietary commercial intelligence platform for iGaming operators. We automate UX benchmarking and competitor proposition tracking at scale — transforming manual research, subjective opinion, and reactive analytics into structured, near-real-time intelligence.

01

Proactive > reactive

Identify what will go wrong before users churn.

02

Continuous intelligence

Always-on benchmarking, not point-in-time snapshots.

03

Commercial relevance

Connected directly to NGR, churn, and conversion.

WHO WE SERVE

Primary ICP

Multi-brand operators · Sportsbook & casino · UK, EU, LATAM, NA · £50M+ revenue · CPO / CCO / CMO

Secondary ICP

Platform providers & technology suppliers — embed performance intelligence into their ecosystem

Three products. One intelligence layer.

UX INTELLIGENCE

Jurnii UX

- Offer benchmarking vs competitors
- Real-time alerts & historical database

MARKETING ATTRIBUTION

Cortex

+46%

more deposits on same budget

- Causal impact & MMM attribution
- Cross-channel Gantt planning
- AI analytics assistant
- Finance reconciliation & reporting

Proactive UX intelligence.

AI-powered UX audit platform that analyses iGaming brands across 4 key dimensions, delivering 70+ ranked, commercially weighted recommendations in minutes — not weeks.

70+

Ranked recommendations per audit

4

Key UX dimensions analysed

Minutes

Time to full audit — not weeks

300+

Brands analysed since launch

THE FOUR DIMENSIONS

1	Journey effectiveness How well your site guides users to their goals	78
2	Usability Navigation, clarity, and heuristic quality	82
3	Performance Page load, SEO, accessibility, and front-end quality	71
4	Perception How your experience makes users feel about your brand	86

CommercialRadar.

Automated competitor proposition intelligence. Track every promotion, bonus, and campaign across your competitive set — updated daily with real-time alerts, structured for MMM use.

1,000+ Offers tracked per week	35 Markets monitored simultaneously
40+ hrs Saved per week vs manual monitoring	Hours Competitive response time — not days

CAPABILITIES

- 01

Live promotion tracking

All competitor offers surfaced within hours of launch
- 02

Timing & sequencing

Know exactly when competitors move relative to events
- 03

Offer benchmarking

Compare bonus value, mechanics, and targeting strategy
- 04

Trend spotting

Detect emerging mechanics — gamified, parlay, cross-sell
- 05

Real-time alerts

Instant notifications; trading, CRM, and marketing aligned
- 06

Historical database

Full archive for seasonal trend and playbook analysis

Marketing intelligence & attribution.

One platform for every marketing decision. Replaces fragmented tools, spreadsheets, and siloed dashboards with a single intelligent workspace for planning, attribution, and AI-powered analysis.

AI analytics assistant

Plain-English queries, instant cross-channel answers

Causal impact & MMM

True incremental attribution, not last-click

Cross-channel Gantt

Sponsorships, affiliates, paid, CRM, ATL — one view

Finance reconciliation

AI auto-matches invoices to marketing activity

AI snapshot reports

Auto-generated exec reports — weeks of work in minutes

Scenario planning

Model budget decisions before committing spend

REAL RESULTS

\$17.1M marketing budget, one operator engagement.

+46%

More deposits — same budget, after reallocating \$3M

3×

Marketing matters more for new vs blended acquisition

40×

Cost-per-deposit gap between best and worst channel

\$4.85M

Single budget line identified returning 0.05× ROAS

Not built for yesterday's market.

DIMENSION	Traditional agencies	Generic analytics	Jurnii
Speed to insight	Weeks / months	Reactive, post-event	Near real-time
UX benchmarking	Opinion-led	—	AI-powered, structured
Competitor intelligence	Manual snapshots	Internal data only	Automated, always-on
Commercial connection	Deliverable docs	Vanity metrics	NGR, churn, conversion
Marketing attribution	Not in scope	Last-click only	Causal MMM modelling

Growing fast. Proving value.
